SIMSTONE PRODUCTS

Simstone products are manufactured from precast concrete, mixed with inorganic oxide pigment for evenly distributed colour and durability. No slag is used in our concrete mix and dolomite aggregate is added for corrosion resistance. Simstone products are manufactured to, or exceed, the South African national standards.

SURFACE EFFLORESCENCE

Efflorescence, or lime bloom, is a natural phenomenon which can occur unpredictably on all concrete products. It is caused by the migration of calcium salts from within the product to the surface. It is a white film deposit which can temporarily affect the appearance of the product. Efflorescence is not a loss or fading of the colour.

INSTALLATION & CARE

It is advisable to seal paving products with an approved sealant where exposure to water and moisture occurs. This is strongly recommended for paving around pools and pool copings where pool water is treated with hydrochloric acid.

Simstone hosts a full range of recommended "Tile and Floor Care" products which have been specifically developed for the requirements of concrete products.

By following the necessary guidelines when installing our products and using our recommended protective sealing and cleaning products maximum aesthetic appearance can be maintained and most efflorescence problems can be prevented. Our sales representatives will assist you with advice on the preparation, installation and after-care of our products.

DO's & DONT's

We, at Simstone, recommend that our products should be installed by a professional contractor. In the case of a D.I.Y. installation contact our sales representative for appropriate guidelines.

TRANSPORTATION

Simstone will arrange delivery to site on request.

HEALTH & SAFETY

Cutting, drilling and handling of concrete products must be done with care. Commercially available protective gear should be used at all times. Refer to Simstone Health and Safety Instructions.

AVAILABILITY

The manufacturer reserves the right to upgrade, modify or discontinue any of the products or specifications without notification. All goods are subject to availability and to the Company's Conditions of Sale which are available on request.

SIMSTONE PRODUKTE

Simstone produkte word gefabriseer van voorafvervaardigde beton, gemeng met anorganiese oksiedpigment om 'n gelyke verspreiding van kleur en 'n duursame produk te verseker. Geen slagment word bygevoeg nie en dolomietaggregaat word gebruik om verwerking te verminder. Simstone produkte word vervaardig om gelyk aan, of beter as die Suid Afrikaanse nasionale standaarde te wees.

OPPERVLAKEFFLORESSENSIE

Effloresensie, of kalkbloei, is 'n natuurlike verskynsel wat onvoorspelbaar uitslaan op alle betonprodukte. Dit word veroorsaak deur die verplasing van kalsiumsoute van binne die produk na die oppervlakte. Dit is 'n wit neerslag wat die voorkoms van die produk tydelik kan beïnvloed. Effloresensie is nie die verlies of verbleiking van kleur nie.

INSTALLERING & NASORG

Daar word aanbeveel dat kliënte produkte wat gereeld aan water en vog blootgestel word, byvoorbeeld rondom swembaddens en swembaddeklake, met 'n geskikte seëllaar seël, veral waar die water met soutsuur behandel word.

Simstone verkoop 'n volledige en aanbevole reeks "Tile and Floor Care" produkte. Die reeks is spesifiek ontwikkel om in die behoeftes van betonprodukte te voldoen en instandhouding te vergemaklik.

Deur die nodige riglyne te volg met die installering van Simstone produkte, en die geskikte seël- en skoonmaakprodukte te gebruik, kan maksimum estetiese voorkoms in stand gehou word en effloresensie onderdruk word. Dit sal die natuurlike voorkoms van u produkte verleng. Ons verkoopsagente sal u bystaan met raad aangaande die voorbereiding, installeering en nasorg van u produkte.

MOETS & MOENIES

Simstone beveel aan dat alle produkte deur 'n professionele kontrakteur geïnstalleer word. Indien u die installering self wil aanpak kan u 'n verkoopsagent nader vir riglyne.

VERVOER

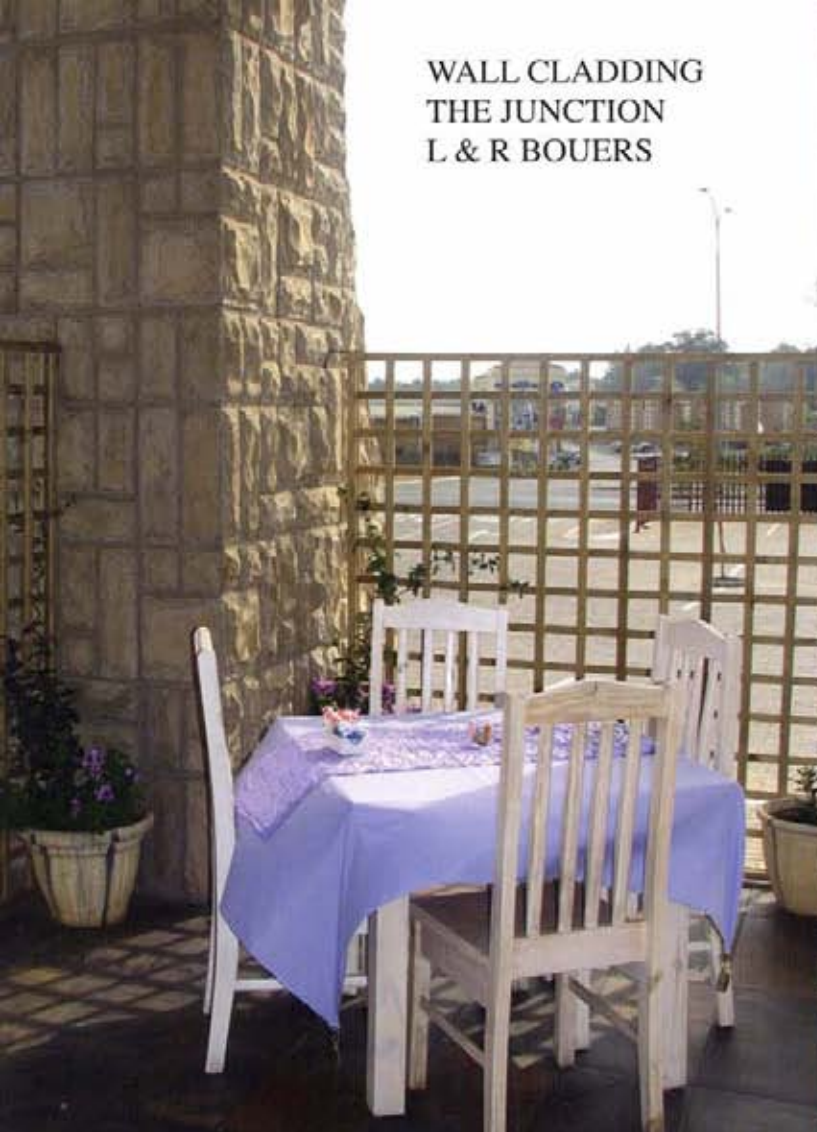

Simstone sal vervoer op u versoek reël na u perseel.

GESONDHEID & VEILIGHEID

Die sny, boor en hantering van betonprodukte moet teen alle tye versigtig geskied. Beskikbare beskermingsdrag moet ten alle tye gedra word. Verwys na Simstone Gesondheids- en Veiligheidsinstruksies.

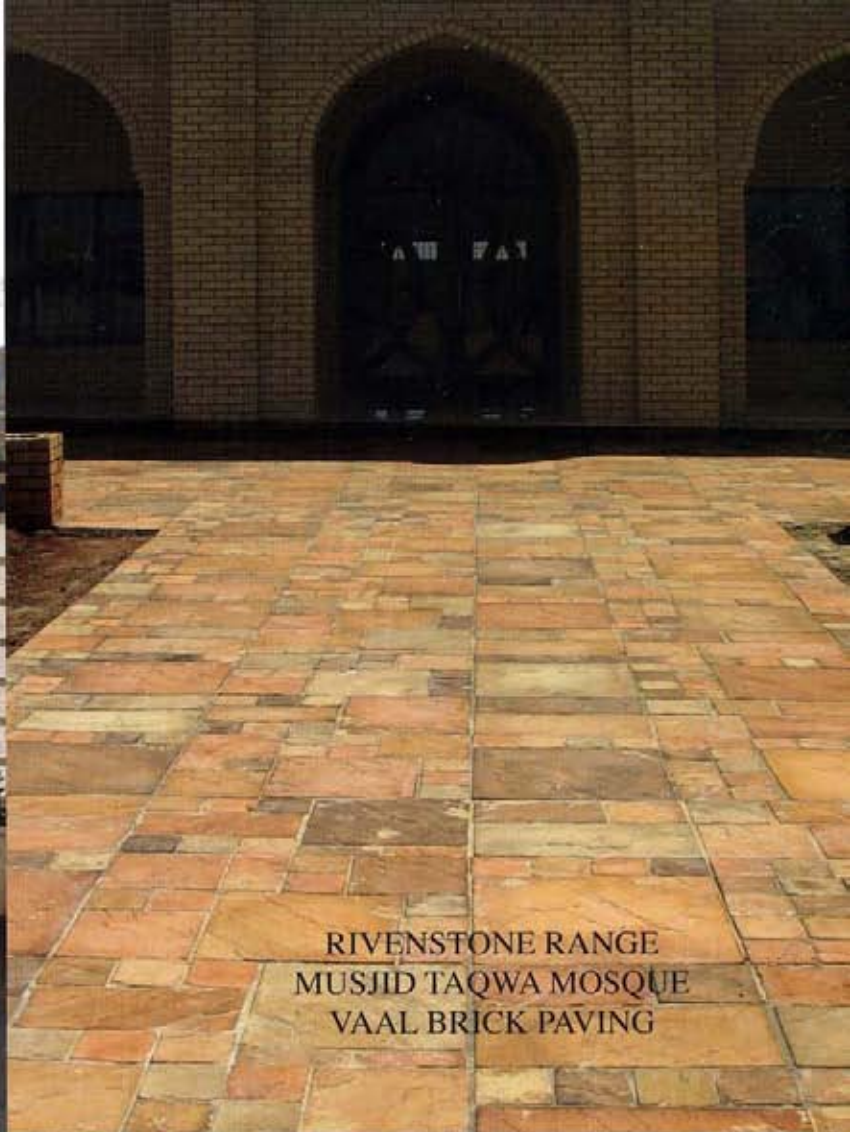

BESKIKBAARHEID

Die vervaardiger behou homself die reg voor om enige produk of spesifikasie op te gradeer, te verbeter of te beëindig sonder om vooraf kennis te gee. Alle produkte is onderworpe aan die Maatskappy se Voorwaardes van Verkope wat op aanvraag beskikbaar is.

WALL CLADDING
THE JUNCTION
L & R BOUERS

This photograph shows an outdoor dining area. On the left, a wall is clad in large, rectangular, light-colored stone tiles. In the center, a white wooden table is set with a white tablecloth and a purple runner, surrounded by white wooden chairs. A wooden lattice screen is in the background, and a potted plant is on the left.

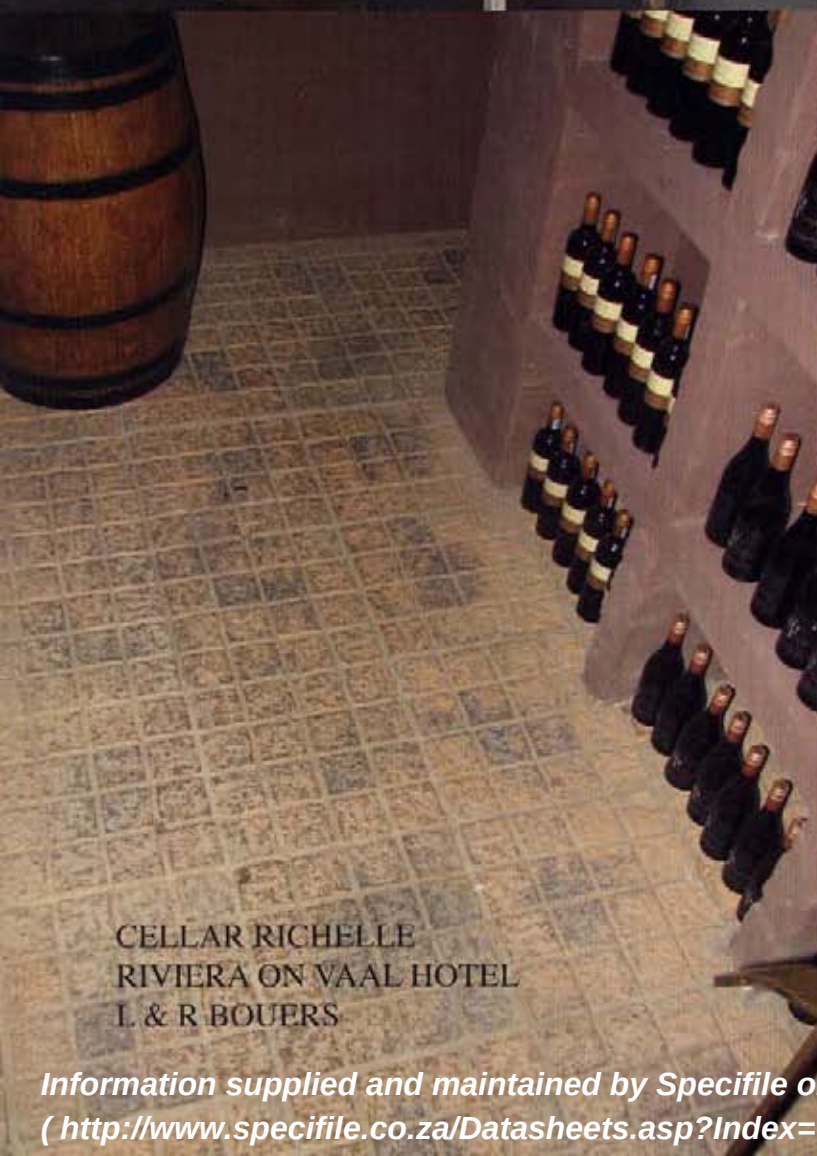

RIVENSTONE RANGE
MUSJID TAQWA MOSQUE
VAAL BRICK PAVING
